To the Trade

OUR aim in compiling this Catalog has been to present a maximum of desirable information regarding our line of High Grade Plumbers' Specialties in a minimum of space.

¶ No space has been devoted to inessential constructional details, nor to illustrations of more than one article when one illustration fairly represented the whole line.

¶ Tables of dimensions, however, giving the various sizes and most essential details are included in each case.

¶ It is hoped that the arrangements will meet with the favor of those looking for specialties to suit their particular needs, as the information and illustrations thus condensed may be easily referred to, in that a book of smaller dimensions is thus made possible and we hope it will be found most convenient by our trade The Master Plumbers.
